Int

A solid green oval shape that serves as the background for the text.

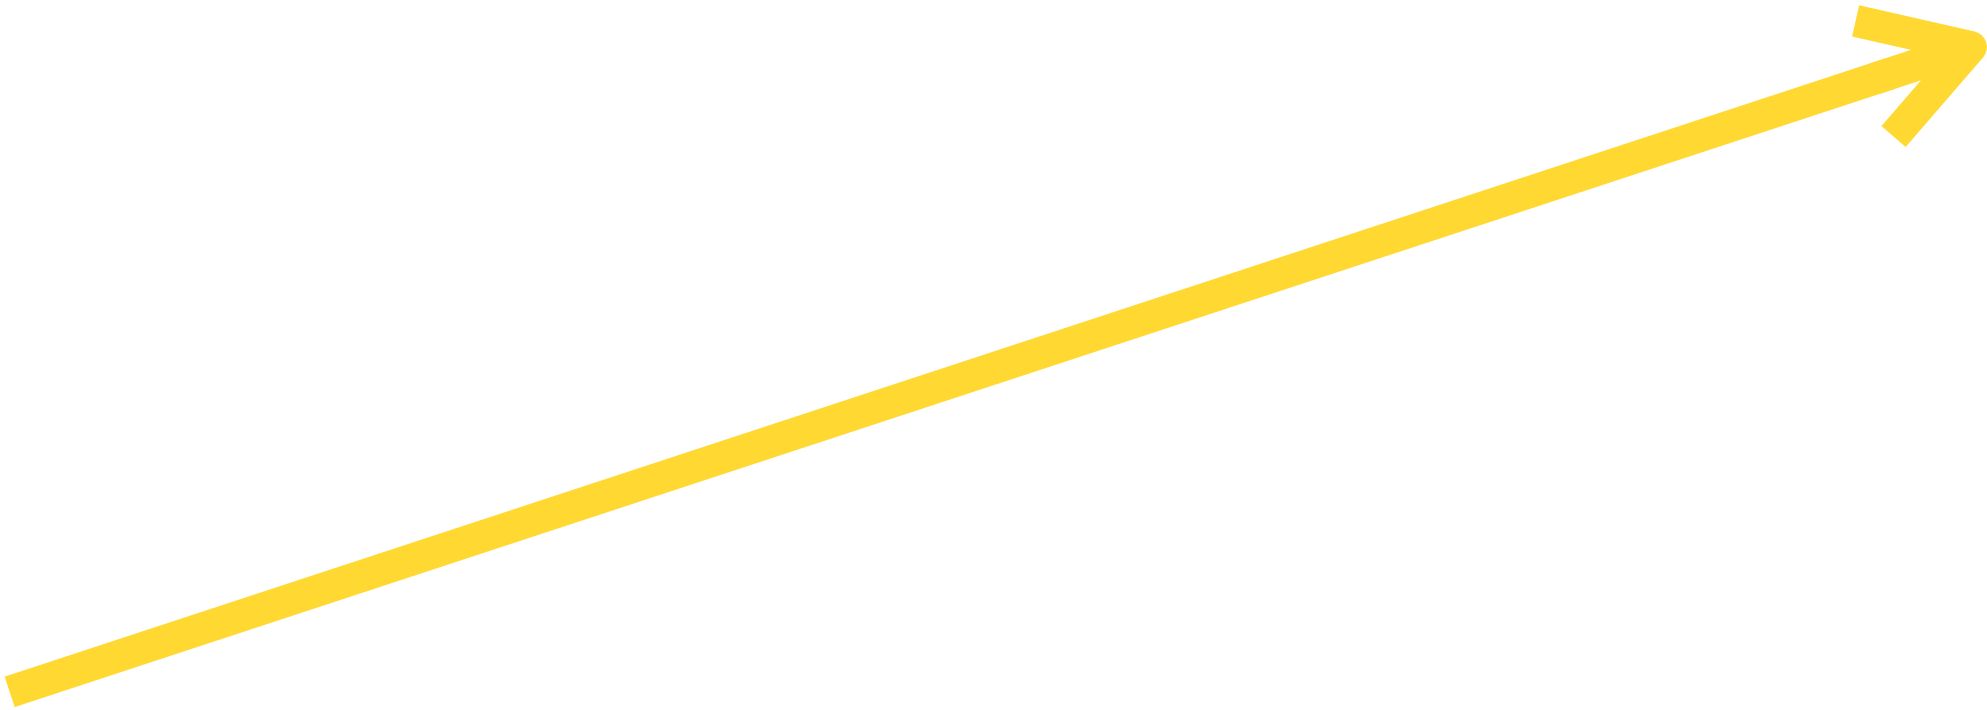

Number

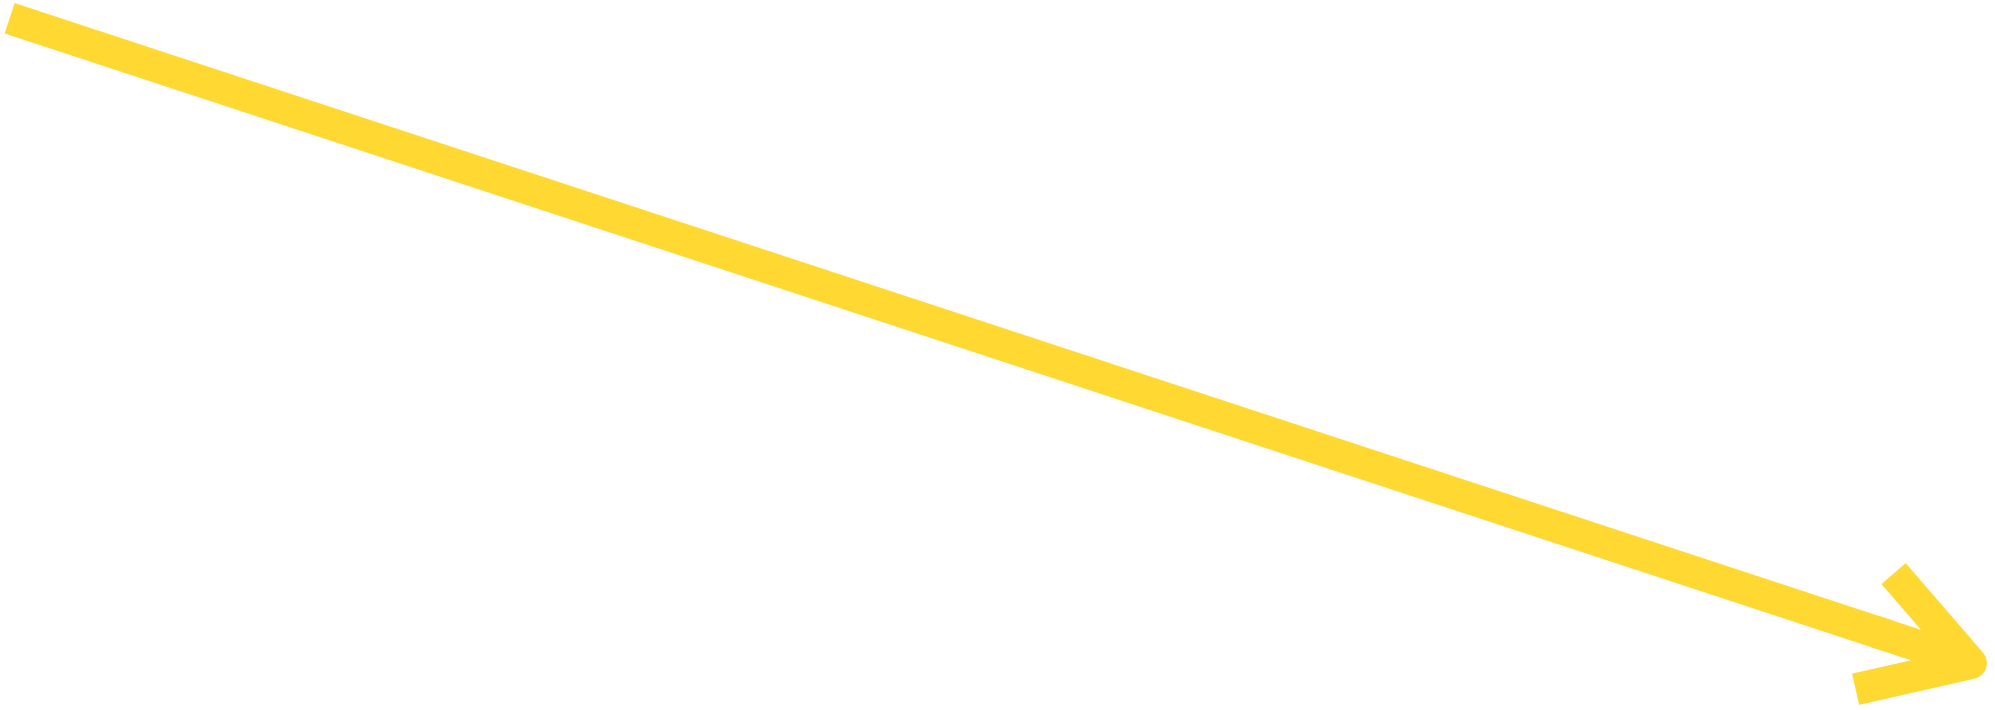

Generics

interface Comparable<in T>

`Comparable<A>`

`Comparable`

A large, solid green oval shape centered on a white background. In the middle of the oval is a large, white, bold capital letter 'B'.

B

A large, solid green oval shape that fills most of the frame. In the center of this oval is a white capital letter 'A'.

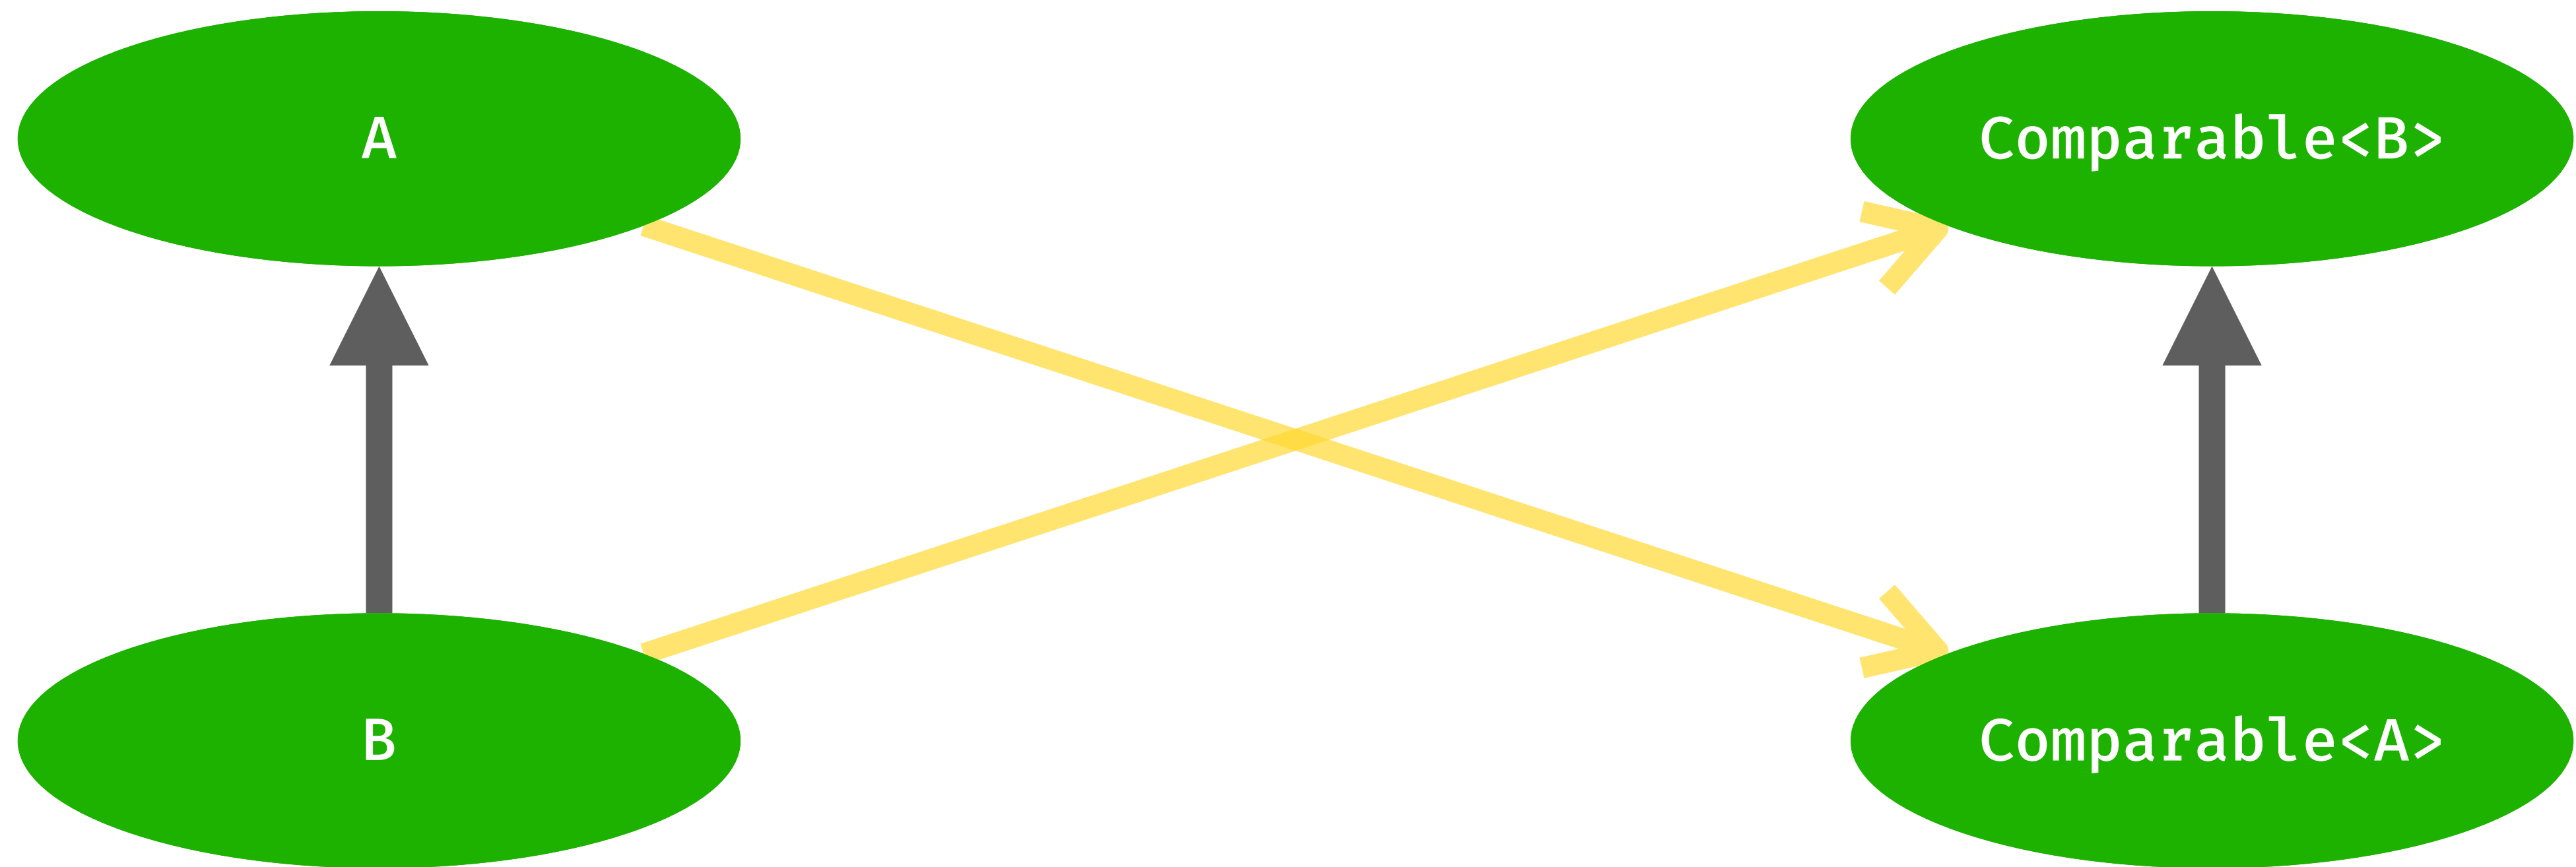

A

contravariance: in

Generics

contravariance: **in**

```
interface Comparable<in T>
```

Could a **class/interface** be both **covariant** and **contravariant**?
